The Essential First Step

Height 1440mm

Base Diameter 320mm

Post Diameter 51mm

Material Titanium

Additional Notes

Australian Bollards - Crowd Barrier Stanchions are the most popular and effective line management system, keeping your lines moving in a safe, orderly way. These barriers help to isolate areas during events and are simple to use and setup. They can be easily stored away when not in use.

Applications include banks, auditorium, retail environment, entertainment venues, airports, restaurants, bars, entryways, ticket booths, cash registers, banquet halls, hotel lobbies, conferences, exhibition, galleries, museum displays etc.
