**Wall Thickness** 12mm (Heavy Duty)

**Material** Mild Steel, Metallic Powder Coated in AB-Yellow.

**Installation** Sub-Surface mounted in concrete or core-drilled.

**Weight** 62 Kg

**Additional Notes**

Trident Bollards provide premium protection for pedestrians, vehicles and assets in high traffic scenarios. A suitable equivalent for any of the Omni Bollards. Forming the nucleus of the Trident system from Australian Bollards, two of these units flank a Solar LED Line Marker that enables a holistic safety solution by increasing pedestrian visibility.

This method of security is particularly focused on fortifying overhead gantries within construction zones and loading docks, a resolution that will prevent people from harm and vehicles from damage.
